Embark on a "One Day Journey" into Skeletal Anchorage in Orthodontics

Learning Objectives

Comprehensive understanding of TADs

Learn about the characteristics and advantages of temporary anchorage devices (TADs) in orthodontic treatment, merging theoretical knowledge and practical applications.

Proficiency in TAD insertion techniques

Attain expertise in diverse TAD insertion techniques, covering dependable insertion sites crucial for successful orthodontic interventions, through theoretical learning and hands-on practice.

Integration into the clinical workflow

Develop a comprehensive approach to integrate TADs seamlessly into clinical workflows, encompassing digital methodologies, ensuring optimised treatment efficacy.

Practical application of skeletal anchorage

Explore practical applications of skeletal anchorage in the upper jaw, gaining immediate integration skills applicable in diverse orthodontic scenarios encountered in daily practice.

Combination of TADs with other appliances

Learn the strategic integration of TADs with various appliances, with a specific emphasis on their synergy and effective utilisation in combination with clear aligners for managing complex orthodontic cases.

Mastering mini-implant supported mechanics

Acquire mastery in applying mini-implant supported mechanics, across a spectrum of indications, ensuring effective treatment outcomes and versatility in orthodontic solutions.

Prices Include lunch & coffee breaks.

PRICES:

Max 10 delegates per course

Option 1: £780 inc. vat

Option 2: including starter kit (worth £600) £1170 inc. vat
